

Why Streimer?

- **We're focused on solutions** — That's our mission at Streimer: solutions. That means we look beyond standard products and find a way to make unique projects possible.
- **Unmatched lead times and delivery** — Your supply chain is key factor in your project momentum — at Streimer, we consistently outpace the market and reliably deliver on schedule.
- **We're service-centric** — A production shop is more than a collection of equipment; it's only as good as it's people. Our team works closely with our customers, taking a collaborative approach to win together.
- **Access to our team** — We're not bound by hierarchy or relationship barriers, and we have the resources to back your project with the right people, from the leaders of our manufacturing and operations to sales and project managers, skilled fabricators, and construction experts.
- **Our trusted partner network** — Our partnerships with locally-based suppliers have been built through long tenures in the industry. We trust them to meet Streimer standards when it comes to high-quality finished products, from galvanizing to painting and more.

Our Expertise

- **Design, engineering, & detailing** — Whether you're bringing rough sketches or finished shop drawings, our team makes your concept ready for production. We'll dial in the details for manufacturing efficiency and ease of installation, ensuring the right-fit product for your needs.
- **Structural to architectural** — We've produced everything from heavy equipment platforms to steel-clad building exteriors. Regardless of the application, we have what it takes to make it right.
- **Materials and finishes** — Our familiarity with a wide range of precision metal components opens up nearly unlimited possibilities for your production.
- **The path to scale** — In some cases we're producing a one-off prototype while in others we've become the dedicated OEM supplier. We'll meet you wherever you are on your path to scale.

Our Capabilities

Laser with SigmaNest nesting software

- Trumpf 4000-watt fiber laser
- Mild steel to 3/4"
- Stainless Steel to 5/8"
- Aluminum to 1/2"
- Copper and brass to 1/4"
- 5' x 10' table

CNC Press Brake

- 250-ton capacity
- 13.9-ft bed
- Precision 6-axis CNC back gage
- Variety of dies available for custom forming

Forming machines

- 13-ft RAS CNC folding machine Flexibend – up to 12 gage MS. 14 gage SS
- CNC Rolls up to 1/4" plate mild steel, 6' width

Welding

- Laser, GMAW, TGAW, resistance seam, resistance spot, soldering, brazing, etc.

Ductwork

- Fully automated rectangular duct line
- Round duct and fittings fabrication
